

python实现快速列表相加

列表相加，需要保证两个 list 长度相同

Python |

```
1  from itertools import zip_longest
2
3  list1 = [1, 2, 3]
4  list2 = [4, 5, 6, 7]
5  result = [x + y for x, y in zip_longest(list1, list2, fillvalue=0)]
6  print(result) # 输出: [5, 7, 9, 7]
```
