

# 快速创建vue文件模板

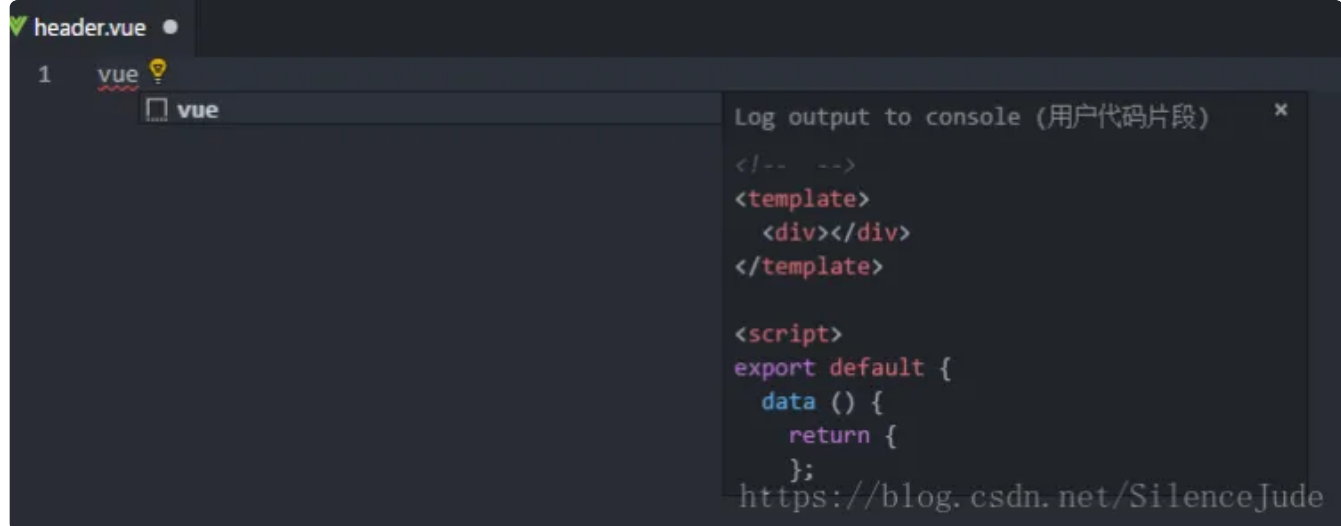

打开VSCODE编辑器，依次选择“文件 -> 首选项 -> 用户代码片段”，此时，会弹出一个搜索框，我们输入vue，如下：

选择vue后，VSCODE会自动打开一个名字为vue.json的文件，复制以下内容到这个文件中：

```
JSON |
1 {
2   "Print to console": {
3     "prefix": "vue",
4     "body": [
5       "<!-- $0 -->",
6       "<template>",
7       "  <div></div>",
8       "</template>",
9       "",
10      "<script>",
11      "export default {",
12      "  name: ",
13      "  data () {",
14      "    return {};",
15      "  }",
16      "  created () {",
17      "  }",
18      "",
19      "  components: {}",
20      "",
21      "  computed: {}",
22      "",
23      "  mounted: {}",
24      "",
25      "  methods: {}",
26      "}",
27      "",
28      "</script>",
29      "<style scoped>",
30      "</style>"
31    ],
32    "description": "Log output to console"
33  }
34 }
```

我们新建一个名为header.vue的文件，输入vue按下enter，就会自动生成内容(此处应该有截图)：

如下图:
