## 将项目托管到gitee码云

1. 生成ssh公钥,在用户目录下的33045下的.ssh目录运行

```
1 ssh-keygen -t rsa -C "3304559720@qq.com"
```

## 这里我没有设置密码

2. 将下面的公钥配置到gitee设置里的ssh公钥中

- ssh-rsa AAAAB3NzaC1yc2EAAAADAQABAAABgQC4N74hJdZ+QY5BWW4DOmSjj7xzVpXPSqPpWCQxIPx8uV uv+nL+cIvxChVsSI5j5Vk8i1EP2rtjh66DD3vPYqfAVCbTichDgbuYpaIaxdV7SVk9shrlecqjJguniMj7 Ly4C64t7JbdGc7fIxT/Z8MtBS8zyzn9gXw77h3k4CNacZAEEN3WJ8DzqQcqG1KbAr5eU8/8laAh9M8BZD1 jLAPfNvunX+Wdzb9IaleqWMx4cPaey1hh7XeVjXfdLS7IMgtkRhemeOETObQembWOrZRPVc3mi5dQEg9Fj FfajC/91PV3jUCmp2iodn5WovhQKmahzMBbIBe6CxrtjsY5imkX83WifU5tYNFSaa/5bZ1QOrbSspgt0Mw KVkoc3mqhH+hOyKfNTE/hnP1Y+BsX3OBX00kIB5Ktzk/LdhM96siYBa2DyfiaJ7Hfg2EKRwPk018xk+vaX tf3PU4G65C6IibZFNyfVPzm7nbsEGs7Ace+JmCCWnLPx/i85TZiRLaiJLak= 3304559720@qq.com
- 3. gitee中新建一个仓库,选择开源
- 4. 推送项目的方式设置为ssh,不要https
- 5. 项目目录下输入
- git remote add origin git@gitee.com:yangzhi-li/uni-app-waimai.git
- 2 git push -u origin "master"
