已修改内容

Common

RoleEnum

1. 新增role：骑手

```
// 骑手
no usages
RIDER
```

config

1. jwt（添加骑手权限）

```
} else if (RoleEnum.RIDER.name().equals(role)) {
    account = riderService.selectById(Integer.valueOf(userId));
}
```

Controller

1. WebController

```
@Resource
private RiderService riderService;
```

```java
} else if (RoleEnum.RIDER.name().equals(account.getRole())) {
    account = riderService.login(account);
}
```

```java
} else if (RoleEnum.RIDER.name().equals(account.getRole())) {
    riderService.register(account);
}
```

Entity

orders.java

1. 新增 riderID

```java
/** 骑手ID */
2 usages
private Integer riderId;
```

2. 新增 riderName

```java
2 usages
private String riderName;
```

Service

1. UserService &RiderService
   add 方法，修改默认头像

```java
user.setAvatar(http + "default-avatar.png");
```

Mapper

OdersMapper.xml

1. updateById方法添加 riderID 字段

```xml
<if test="riderId != null">
    rider_id = #{riderId},
</if>
```

2．inser方法添加 riderID 字段

```
<if test="riderId != null">#{riderId},</if>
```

```
<if test="name != null">name,</if>
<if test="riderId != null">rider_id,</if>
```

Utils

1．TokenUtil

```
    } else if (RoleEnum.RIDER.name().equals(role)) {
        return staticRiderService.selectById(Integer.valueOf(userId));
    }
```

File

1．修改用户以及骑手的默认头像和名称（Service 层）
